PATIENT CONSENT

Patient Consent to Genetic Testing

Your doctor has ordered genomic sequencing and analysis (the "Test") to obtain additional information that may inform medical management of your cancer. This document describes the potential risks, benefits, and limitations of the Test. If you have any questions or need additional information, please consult your doctor before signing. You are not required to have this test. If you decide to authorize the Test, please sign and date where indicated at the end of this document.

Purpose & Process

Tempus will perform Next Generation Sequencing ("NGS") and analysis of certain regions of your DNA that may be associated with your cancer and will report Test results to your doctor. Tempus will perform its most currently approved version of the Test ordered by your doctor. The goal of the Test is to identify key characteristics of your cancer that may inform clinical decision making. Tempus will work with your doctor to obtain tumor samples and/or normal samples (saliva, blood, and/or a buccal swab) and information from your electronic health record. DNA will be obtained from samples, stored, and analyzed. In order to improve the quality of our testing, Tempus may retain your tissue, cells and/or DNA extracted from your cells for an indefinite period of time following the testing ordered by your doctor and use leftover materials for internal purposes, including quality assurance and test validation. Tempus may also remove directly identifying information from these materials and associated clinical information and use them for research purposes, including future research related to cancer diagnosis, testing and therapies.

I do not wish for Tempus to retain any residual material from my specimen(s) and instead wish for them to be destroyed at the end of the testing process or not more than sixty days after the sample was taken, in accordance with New York State Law.

Risks, Benefits, & Limitations

Tempus' Test report does not provide any medical diagnosis and does not make any specific treatment recommendations; instead it provides information for your doctor to review. There is no guarantee that performance of the Test will yield clinically relevant information, inform your doctor's clinical decision-making or otherwise lead to any particular or beneficial outcome for you.

Test results may show one or more "actionable" genomic alterations, meaning that there may be FDA-approved therapies available that target your specific type of cancer or that certain clinical trials may be available to you. Knowledge about the effects and meaning of genetic changes is constantly changing. This Test does not examine every possible variant that may exist, and the technology also may not identify all variants related to your cancer, because there is a possibility of testing errors by Tempus and because some biological factors may limit the accuracy of results. Tempus is under no ongoing obligation to update, revisit or later re-evaluate the results of the Test after those results have been made available to your doctor through the test report described above.

Performing Tests on your normal (non-tumor) tissue, including the xG Test, may reveal certain personal health information about you or information about your genetic profile that is unrelated to your cancer diagnosis, such as hereditary information, additional diagnoses, or changes in your condition ("incidental findings"). The Test Reports will include information about incidental findings. In each case where incidental findings are reported, you may learn medical information about yourself (or your family) that you did not expect. You may want to discuss this information with your physician or a genetic counselor. If you want to talk to a genetic counselor, you can ask your doctor to refer you to one, or you can find contact information on the Test Report that Tempus will make available to you or your doctor. These incidental findings may be important to determining an appropriate course of treatment; however, you are not required to receive them. Your signature below indicates that you have read, understood, and agree to receive incidental findings related to the Tests ordered by your physician.

Assignment of Insurance Benefits; Authorization; Appointment as Legal Representative

I hereby assign all applicable health insurance benefits and/or insurance reimbursement I have under my health plan(s) to Tempus Labs, Inc. ("Tempus") for services performed by Tempus. I also appoint Tempus as my authorized representative and convey to Tempus, to the full extent permissible under the law, the power to: (1) file medical claims with the health plan; (2) file appeals and grievances with the health plan and/or any agency or governmental body with applicable authority; (3) obtain and release, medical records and insurance information as necessary to process a claim, appeal or grievance; and (4) collect payment of any and all medical benefits and insurance proceeds (including Medicare and Medicaid). The above appointment and conveyance includes all my rights in connection with any claim, right, or cause of action including litigation against my health plan that I may have, including, the right to claim on my behalf, all such benefits, claims, or reimbursement, and to seek any other applicable remedy, including fines.

Specimen Release

By signing below, I authorize the release of my original pathology slides/blocks/clinical specimens and other materials, including extracted DNA and RNA, that are requested by Tempus ("Materials"), and I hereby direct the pathology lab receiving this request to release and provide all such Materials to Tempus. I understand that the Materials may be irreplaceable and could be lost or damaged in handling, transit or when used. I agree to release Tempus and any pathology laboratory releasing such Materials from any claims I may have for any such loss or damage to the Materials.
