## INTRODUCTION

### TIME Program

Rapid access to a network of cutting-edge clinical trials

- **Phase I-III studies** including oncology, urology, pediatrics, and cell therapy
- Trial only opened when a patient was ready to enroll
- **Streamlined trial startup process** eases administrative burden
- **10-day activation** allows providers to open trials in response to patient need

## SUMMARY

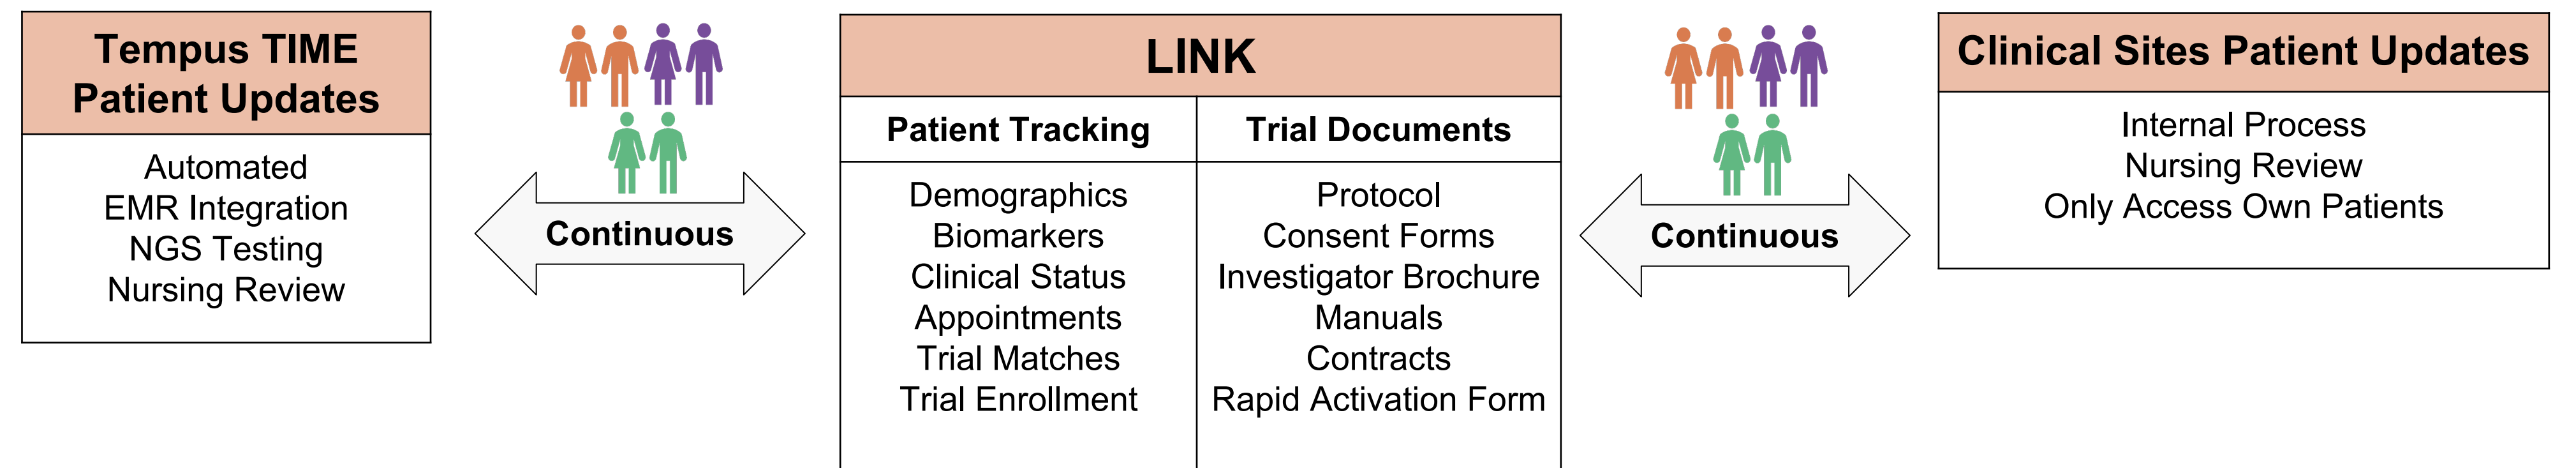

- LINK has enabled real time patient tracking and communication to facilitate clinical trial enrollment
- Currently LINK is averaging 400 new patients monthly which is a 13.1X increase since the TIME program's inception
- Highest performing Clinical Sites enrolled  $\geq 80\%$  of patients & included those with EMR integrations and/or  $\geq 50$  patient updates yearly

## METHODS

### LINK Portal

Enables the longitudinal tracking of patients

- Currently screens **>1 million patients** daily
- **EMR integrations** and **NGS testing** through an **automated matching platform**
- All matches are verified by **nursing review**
- **Real-time information exchange** between TIME sites & Tempus

## RESULTS

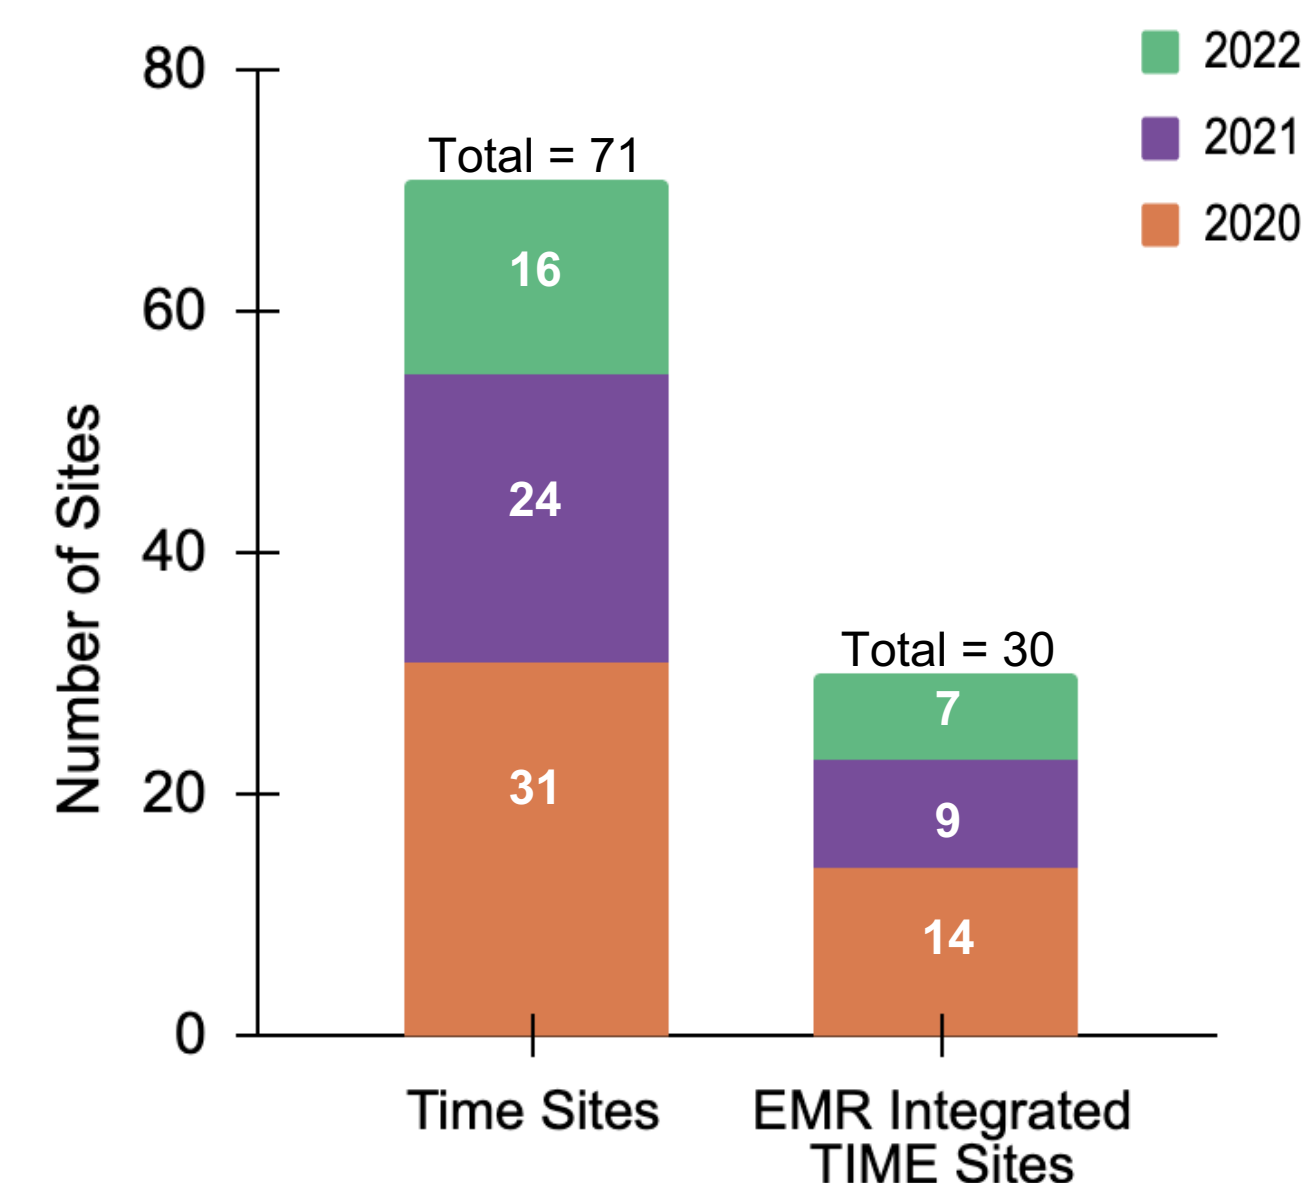

Figure 1- Total & EMR Integrated TIME Sites

LINK Data	2020	2021	2022	Total
Patients Added Total	365	1691	4789	6816
Patients Added Monthly (Avg.)	48	141	399	219
Patients No Longer Trial Eligible	132	498	1261	1891
Patient Trial Consents	20	252	351	623

2022 LINK EMR Integration & Trial Enrollment		
EMR Integrated Site	Number (%)	Enrollment (%)
Yes	30 (42.3%)	288 (82.1%)
No	40 (57.7%)	63 (17.9%)

Note – NGS testing with Tempus is not required to participate in the TIME program

2022 Clinical Site LINK Patient Updates		
Patient Updates $\geq 50$ / year	Number of sites (%)	Enrollment (%)
Yes	27 (38.6%)	291 (82.9%)
No	43 (61.4%)	60 (17.1%)
