PHYSICIAN SIGNATURE & CONSENT

By signing and/or submitting the order, I certify that (1) the patient has received an explanation of the purpose, risks, and benefits of the ordered test(s); (2) the ordered test(s) are medically necessary and will inform the patient's treatment plan; (3) unless otherwise set forth on this form, the patient has recurrent, relapsed, refractory, metastatic, or advanced stage III or IV cancer; and (4) the patient has provided informed consent that meets the requirements of applicable law for Tempus or its reference lab to: (a) collect and use the patient's samples (including genetic material) and health information and perform the ordered test(s); (b) obtain, receive, and release health information (including test results) as necessary for reimbursement or the processing of insurance claims; (c) retain and use samples and health information for an indefinite period of time in accordance with applicable law; and (d) de-identify such samples and information and use and share the resulting de-identified samples and information in accordance with applicable law.

In addition, I certify that if xT and xF/xF+ are ordered within 30 days of one another, the order is medically necessary because guidelines support the use of testing, turnaround time for tissue result may delay a treatment decision, the tissue is at risk to fail (e.g. small tissue, archived tissue) and I may not have a timely result to make a treatment decision; and/or genomic heterogeneity may cause available tissue to not be completely representative, and I want to make sure I have a complete mutation profile.

Included Attachments: ☐ Copy of patient's progress notes and/or medical records ☐ Copy of recent pathology report ☐ Copy of insurance card
